MS. BIANCA CLAUDETTE R. CANLAS

Governing Council Chairperson

Metropolitan Manila Industry, Energy and Emerging Technology Research and Development Consortium
(MMIEERDC)

DOST-NCR, Taguig City

Dear Madam,

This letter expresses the **University of Caloocan City's (UCC)** sincere intent to become a member of the **Metropolitan Manila Industry, Energy and Emerging Technology Research and Development Consortium (MMIEERDC)**. We recognize the consortium's vital role in fostering collaboration and driving innovation within the National Capital Region's Research and Development (R&D) landscape.

UCC's mission aligns with MMIEERDC's objectives of promoting research, development, and commercialization in key areas of various industries, engineering, information technology, and other emerging technologies. By joining the consortium, we aim to:

- **Strengthen our research capabilities:** Membership will provide us with opportunities to partner with leading academic institutions and government agencies, giving us access to specialized resources, facilities, funding opportunities and a broader network of experts. This will help enhance our faculty's research skills and expand our research output.
- **Promote technology transfer and commercialization:** We are committed to translating our research findings into tangible solutions that benefit other communities, not only in Caloocan. The consortium's platform for technology transfer will enable us to effectively commercialize STI projects and contribute to economic growth.
- **Expand our network and partnerships:** Being part of MMIEERDC will open doors for new collaborations, partnerships, and funding opportunities, which are crucial for sustaining our institution's research initiatives.
- **Contribute to the consortium's research agenda:** UCC has a growing pool of faculty researchers and students specializing in various fields relevant to the consortium's thematic areas.

The University of Caloocan City is prepared to actively participate in all MMIEERDC activities, including research workshops and joint projects. We are ready to adhere to the consortium's policies, guidelines, and commitments to ensure a productive and mutually beneficial partnership.

We look forward to the opportunity to contribute to the MMIEERDC and work alongside its distinguished member institutions to advance scientific and technological innovation. Thank you for your consideration.

Sincerely,

DR. TEODORO A. MACARAEG JR.

AVP for Research and Publication

University of Caloocan City
